SolidWorks 2024 SP05 — Tools & Macros

A collection of Python-based tools and macros for **SolidWorks 2024 SP05**.

Platform: Windows **Language:** Python 3.10+

Getting Started

First-time setup: navigate into the tool folder you want and run `setup.bat`.

Staying up to date: run `update.bat` from the root folder — pulls the latest changes from GitHub and refreshes dependencies for all installed tools automatically.

```
update.bat
```

Available Tools

Tool	Version	Description
SW2024-05-2STEP	0.5.0	Convert SolidWorks files (`.sldprt`, `.sldasm`) to STEP format
